

PRESS RELEASE

Senoko Power achieves Three Million Manhours Safety Milestone

Singapore, 19 November 2009 - Senoko Power Limited has once again achieved another significant safety milestone and set a new benchmark performance. Singapore's largest power generation company achieved three million manhours without any lost-time injury on 22 October 2009, over 742 days. This far exceeds the record of 2.96 million manhours that had also been set by Senoko Power in 2006.

Mr Roy Adair, President & CEO of Senoko Power said, " Senoko Power is proud to have achieved this safety milestone. The unprecedented achievement places Senoko Power in the forefront of safety performance in the electricity generating industry in the whole of Asia."

Senoko Power has a holistic safety programme which includes a combination of a "Carrot & Stick" approach that applies to both employees and external contractors. Initiatives such as the President & CEO award, and regular safety inspections were introduced to encourage internal sections to come up with ideas to improve workplace safety. Safety courses are regularly conducted to ensure employees are familiar with the latest in workplace safety requirements. In addition, a safety demerit points system was also introduced to inculcate both our employees and external contractors to take ownership of ensuring good safety practices.

Mr Adair added: "In Senoko Power, we place great emphasis on work safety. In order to uphold safety standards, we encourage our employees and our business partners to have the right mindset and attitude to always put safety first. This is an integral part of Senoko Power's core values. We are proud to be the safest and most reliable power generating company in Singapore. We shall continue in our efforts to be the leader in setting new safety records in the electricity generating industry as we provide the power to make a difference. "

About Senoko Power Limited

Senoko Power is the largest power generation company in Singapore, providing over 30% of the nation's electricity needs. Senoko Power is the first power generation company in Singapore to import clean natural gas for power generation in 1992, to launch the first combined cycle plant in 1996 and to be certified the ISO 9000 in 1998, OHSAS 18001 in 2003 and ISO 14001 in 2004.

Senoko Power has a combined installed capacity of 3,300 megawatts (MW) comprising 1,945MW of combined cycle plants (CCPs), 1,250MW of thermal plants and 105MW of fast-start gas turbines. Senoko Power owns and operates Senoko Power Station and Pasir Panjang Gas Turbine Station.

Senoko Power is owned by the Lion Power consortium, comprising Marubeni Corporation, GDF SUEZ, The Kansai Electric Power Co., Inc., Kyushu Electric Power Co., Inc. and Japan Bank for International Cooperation (JBIC).

About Senoko Energy Supply (SES)

Embracing the rapid deregulation and liberalisation of the Singapore electricity market, Senoko Power Ltd established its wholly-owned retail subsidiary, Senoko Energy Supply Pte Ltd., to retail electricity directly to major customers. SES obtained a Public Supply License from the Energy Market Authority (EMA) in February 2001 and is the first energy retail company to be certified ISO 9000 in 2002 and OHSAS 18001 & ISO 14001 in 2006. SES is one of the largest electricity retailers in the contestable market.
