CHARGE**

A Future Vision For Singapore

SolarShare's role is crucial in Singapore's journey to Net Zero by 2050. We envision a future powered by 100% green energy, day and night, blending locally produced and imported solar energy.

TRACEABILITY

What is SolarShare?

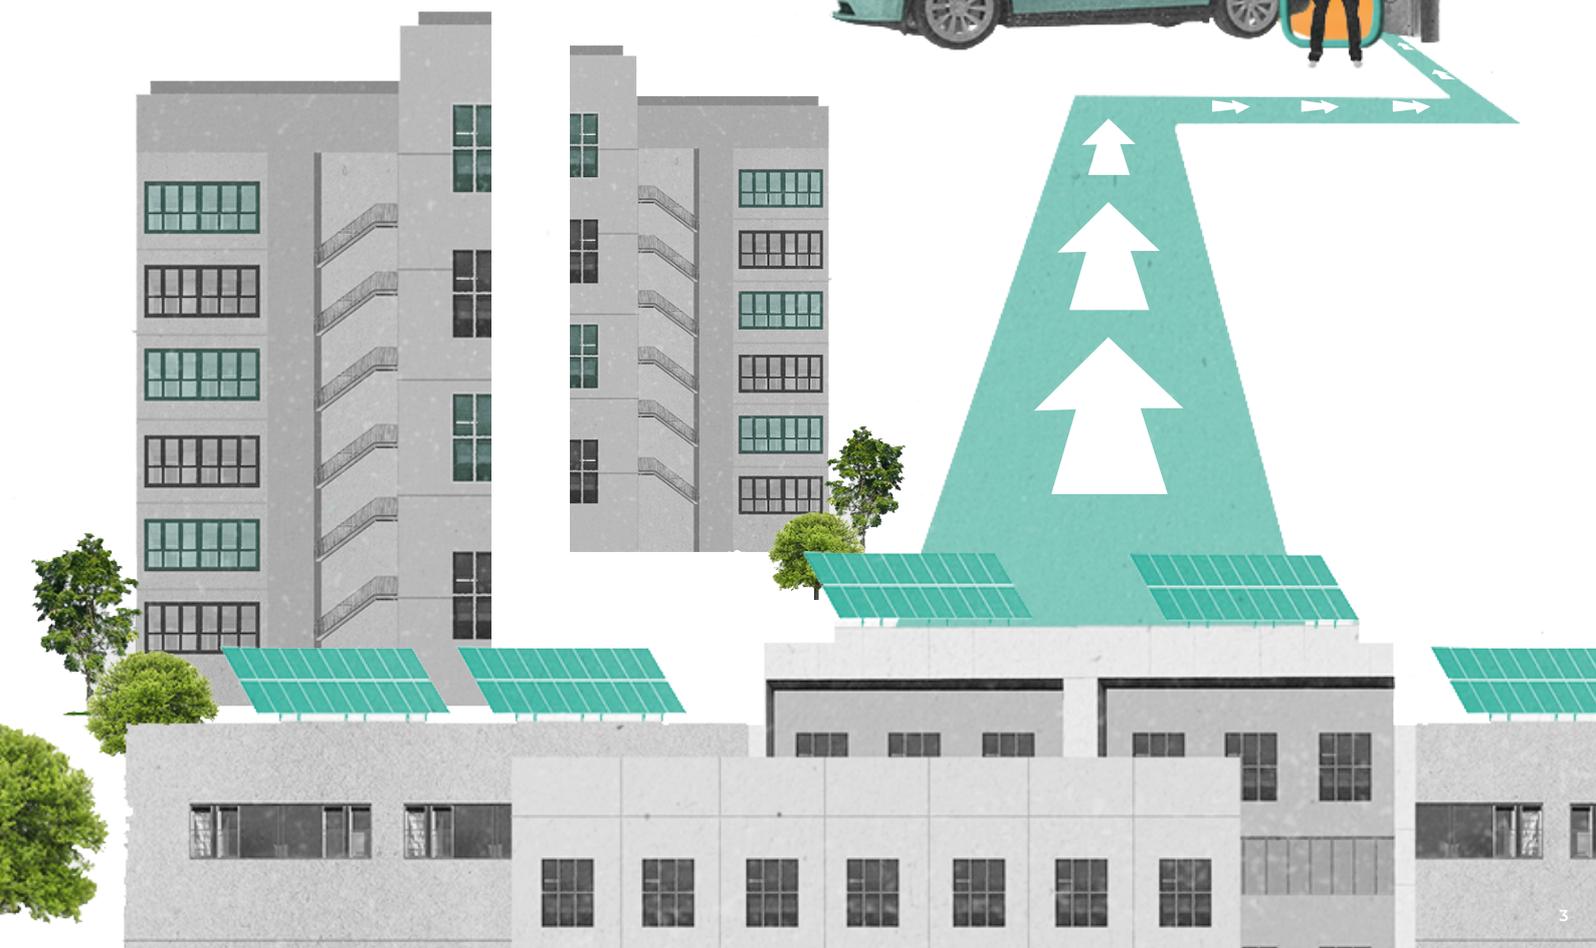

Your Green Energy Gateway

SolarShare is Singapore's pioneering grid-scale peer-to-peer green energy trading platform that makes green energy more accessible to homes and businesses.

A Powerful Platform that Measures & Traces

SolarShare allows consumers to monitor their energy consumption by price every half-hourly from different sources, enabling them to make informed decisions to further reduce their carbon footprint.

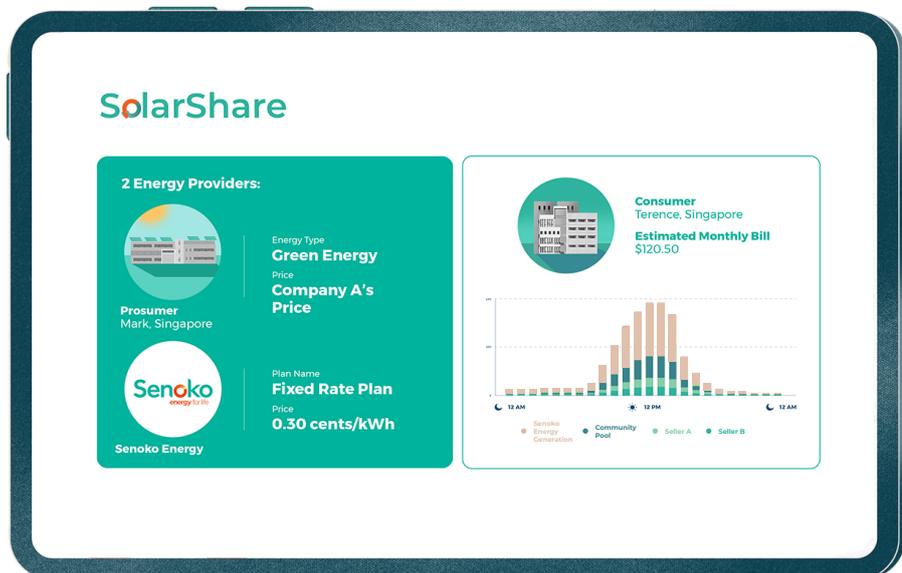

Here's How It Works

FOR A SOLARSHARE SELLER

- Maximise returns on your solar investments.**
- Set your green energy price higher.**
- Boost your solar panel investments.**

Solar panels generate energy as well as Green Attributes that can earn more money. What's more, you can:

- Sell your excess solar generated energy to SP via the grid
- Sell your Green Attributes via SolarShare

1

Sell with Ease

List your Green Attributes on SolarShare at your preferred price.

2

Transparent Pricing

- Peer-to-peer trading allows you to choose from the highest bidder from time to time.
- While community trading offers flexibility, as a seller or prosumer, you can set your preferred minimum price and let SolarShare match you for best deals every half-hourly with a community of like-minded consumers.

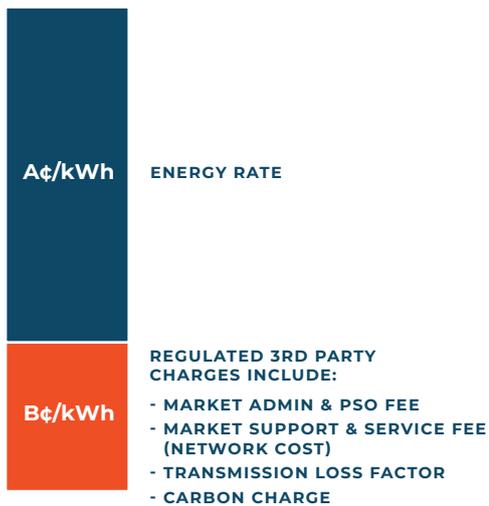

3

Seamless Trading

We keep it simple. Prosumers are charged a platform trading fee of 5% of total traded volume of SolarShare. Any unsold Green Attributes will be sold to Senoko Energy at a predetermined rate.

How to set Seller's Price on SolarShare?

Senoko Contract Price

Join the SolarShare Movement

AND POWER THE GREEN REVOLUTION

If you're a business with rooftop space, seize the opportunity with SolarShare.

Install solar panels, boost your Return On Investment (ROI), and become a local seller. It's a win-win!

Not only will you enhance your ROI, but you'll also play a crucial role in fortifying Singapore's energy security.

You can also contribute excess energy to the grid and share it with the community.

Join SolarShare today and help power a sustainable future for all!

Please note that SolarShare is available exclusively to Senoko Energy customers.
